The Hearing Company

Right wavelength for new Hearing Centre

The Savekers Group completed a total fit-out of the first high street outlet of The Hearing Company, in Hove, Brighton, that offers a new concept for 'walk-in' customers, with qualified dispensing staff using the latest in audio testing equipment.

The suite of bespoke designed items included customer consulting desks, privacy screens and information display units, and was designed by the Group's dedicated in-house CAD design team, and manufactured at its 60,000 square foot production facility and joinery shop in Birmingham.
