Solutions for chemists & pharmacies

Storage for medical supplies, alongside efficient display systems

Functionality lies at the heart of effective and secure storage for medical supplies, alongside efficient display systems that together combine to optimise on available space both at the POS and retail display area, but also the dispensary aspects of chemists and pharmacies.

The design and manufacturing teams at Savekers have established a reputation of excellence both for their understanding of this unique environment and the ability to create and deliver stylish solutions that are robust and practical. The combination of specialist metalwork and joinery design, production and installation, can deliver the complete solution and product suite that combine a mixture of materials and finishes.

- Freestanding and fixed stools, upholstered as required.
- Table bases, table columns and stools, manufactured to a standard specification from our extensive range, as well as to match individual size, finish and design requirements.
- All items available with adjustable and fixed height feet and legs, in a selection of sizes and finishes.
- Lockable cabinets and cupboards for the secure storage of medical supplies and products.
- Sliding track and glass doors, for use with display cabinets and counters.
- Diverse and extensive range of materials including brass, mild, steel, stainless steel and aluminium, with a selection of finishes available including satin, polished and powder coating.
- Bespoke cabinets and counters for the display of products within the retail area or at POS.
- Items can be designed as a one-off or as multiple units following a unique design for a consistent 'look' throughout all applications.
- Furniture such as consulting tables, seating and shelving.

Our customers include

Heaven Health & Beauty - Flagship concession at The Nutri Centre in London and a prime example of the overall solution available from Savekers, which designed, produced and installed a stylish, contemporary and functional suite of timber furniture. This included glass-fronted wall and floor mounted units, glass top units, counter, sample station and consultation table.
