Solutions for Garden Centres

Optimised floor space and counter suitable for large and small items

As consumer interest in home improvement continues to grow, most notably in the area of emulating the great garden makeovers and designs popularised on our television screens, footfall through garden centres continues to rise. And with such a captive audience, garden centres are not only expanding their range but also the facilities available to customers to include gift and card concessions.

Optimising floor space to display gift items and cards as well as create counters and payment stations that are suitable for handling small and large plants through to garden furniture and BBQ's, is key.

A specialist in the design and manufacture of high quality solutions for numerous retail environments, Savekers has undertaken the design, production and installation of both standard and unique items for use in numerous retail environments, stores, and concessions, including gift and card shops and garden centres. These products and solutions span product display, wooden or glass/metal display cabinets, POP and POS, counters and payment desks. Our product range and expertise in this sector includes:

- Standard range of retail display fittings and shelving made from oval or round tube in various sizes, with the flexibility to create an infinite variety of structures from the suite of standard component parts.
- Bespoke items include counters and cabinets, manufactured from all types of wood, with additional items such as glass or metalwork incorporated as required.
- The Cantel range of retail systems is a suite of innovative, stylish interchangeable shopfitting and display systems comprising three ranges each available in a selection of standard materials and to include a comprehensive suite of compatible accessories.
- Counter and cabinet fittings, including shelf strips, feet and legs, locks, hinges, connectors and ventilators, through to balustrades and handrails.
- Turn key solutions for all interior fittings installations.
- A Disability Range, designed with the help of the Disability Access Charter, which meets the needs of the disabled and assists compliance with the DDA.
