Solutions for hospitality & leisure

One-off products through to complete renovation refurbishments

The hospitality and leisure sector encompasses a diversity of venues and facilities – Savekers has an established track record, market knowledge and appreciation of the vagaries of designing and installing joinery or metalwork fittings and solutions for hotels, restaurants, bars, clubs, pubs, betting shops, racecourses and Bingo halls. Furthermore, our range of standard products extends to towel and shower curtain rails for bathrooms, luggage trolleys and bar accessories.

Our in-house CAD technical design team works with our customers to create a design solution for either a one-off single product, or a complete renovation or refurbishment project requiring bespoke bars and fittings, fitted seating, furniture, counters, balustrades or handrails.

And our design and production expertise – derived from more than 100 years as a specialist precision manufacturer and which today boasts the most respected and exacting quality management measures including TQM – is backed up by our on-site installation teams and facilities/project management experts.

Our specialist metalwork production company provides a dedicated design and high quality manufacturing facility of both standard and bespoke metalwork products in a diverse range of materials, for one-off or bespoke designs as well as our standard product portfolio, regarded as the most comprehensive in the UK. Our resource is housed in our 45,000 square foot product facility that includes water jet cutting, CNC machining and chrome plating.

For organisations seeking the design and manufacture of high quality bespoke woodworking solutions, we can produce functional beautifully crafted designs across a range of uses and applications. Our team of skilled craftsmen is experienced in working with all types of wood – real woods, veneers, laminates and panels – to incorporate glass, metalwork or solid surfacing. All wood is sourced from sustained forests, registered as environmentally-friendly sources.

Our customers include

Showcase Cinemas – rope and pillar pedestrian guidance system.

York Racecourse – bespoke metalwork.

Huxley's – metal footrails and brackets for their Black Jack and Roulette tables.
