## Solutions for the NHS

An extensive range of standard, and bespoke products

The UK Government is committed to investing in the National Health Service through its NHS modernisation plan. As such, the health sector is charged with identifying and sourcing products, furniture, fixtures and fittings, amongst many other items, to deliver the patient-led charter, through new hospitals, primary care centres and fast track surgeries.

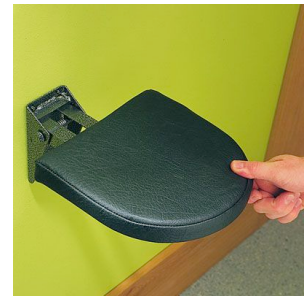

Savekers offers a unique combination of specialist metalwork and joinery design, production, finishing and installation, to deliver the complete solution and an extensive product suite, available in a mixture of materials and finishes. We manufacture an extensive range of standard, and bespoke, products that are hardworking and sufficiently robust to cope with the high level of wear and tear placed on them in a healthcare application. We can handle the supply of single or multiple items, from reception desks, reception room seating and furniture, to balustrades and handrails, shelving, and fixtures for the disabled.

### Disability range

- An exclusive range of handrails and support rails designed with the help of the Disability Access Charter to meet the needs of people with disabilities and assist in compliance with the DDA.
- All products feature a non-slip grip, available in three colours to provide contrast against background colours for those with visual disabilities, and suitable for both inside and outside applications.

### Standard products include

- Table bases, table columns and stools, manufactured to a standard specification or to match bespoke size, finish and design requirements.
- All items available with adjustable and fixed height feet and legs, in a selection of sizes and finishes.
- Wall and floor mounted tip-up seats.
- Shelving and shelving systems for use in office or admin areas.
- Sliding track and glass doors, for use with cabinets and on counters
- Balustrades & Handrails – with adjustable fittings for simple specification and assembly, all balustrades are available in a selection of finishes.
- Fixed and portable pedestrian guidance systems and barriers
- Food Servery systems ideal for the healthcare and associated sectors.
