Solutions for sports & fitness centres

Stylish reception areas, changing rooms, café bars and eateries

For both municipal and private member sports, leisure and fitness, discerning clientele expect the very best facilities and equipment. As such, what frequently make the difference are the surroundings that complete the overall experience of their regular trips to the gym, pool or exercise class.

To this end, functional, durable and stylish reception areas, changing rooms, café bars and eateries equipped with furniture and furniture fittings that work and are practical are all important. Our in-house CAD technical design and extensive metalwork and joinery production facilities, make Savekers one of the UK's market leaders in designing and supplying a range of standard and bespoke items to this specialist sector.

From wooden reception desks, coordinating reception furniture and fittings, benches and fittings for changing rooms, to balustrades, handrails and furniture, seating and bars in refreshment and relaxation areas, we can provide a combination of wood, metalwork and glass integrated design solutions, manufactured to the highest quality control measures. Whether the requirement is for a total refurbishment or renovation, or for individual items that are either completely bespoke or incorporate items from our standard product range, our teams will deliver the most relevant products and solutions.

This design and production expertise – derived from more than 100 years as a specialist precision manufacturer - is backed by our on-site installation teams and facilities/project management experts. In this way our customers can be assured of an efficient and effective end to end design and product solution that meets overall project deadlines.

Our specialist metalwork production provides a dedicated design and high quality manufacturing facility of both standard and bespoke metalwork products in a diverse range of materials. Our manufacturing resources are housed in our 45,000 square foot production facility that includes water jet cutting, CNC machining and chrome plating, and we can produce functional beautifully crafted designs across a range of uses and applications. Our team of skilled craftsmen is experienced in working with all types of wood – real woods, veneers, laminates and panels – to incorporate glass, metalwork or solid surfacing. All wood is sourced from sustained forests, registered as environmentally-friendly sources.
